ELISA Kits - Kits include pre-coated 96-well strip plate, standard, detection antibody, sample dilution buffer, HRP solution, TMB substrate, stop solution, 20X wash buffer, sealing tape and detailed instructions.

ELISA Sets - Affinity purified antibody, calibrator and HRP conjugate are packaged to provide a quantitative ELISA Set. Each set contains reagents sufficient for 1000 single well assays. Sets do not include plates, buffers or substrate. If these components are not readily available in your lab, it is recommended to consider ordering an ELISA Starter Accessory Kit, Catalog No. E101 or Catalog No. E103.
